COMMUNITY SUPPORTED AGRICULTURE

ENJOY FRESH, LOCAL, ORGANIC FOOD AT AN AFFORDABLE PRICE

2011 -- Our 11th year!

WHAT IS CSA & HOW DOES IT WORK?

CSA reflects an innovative and resourceful strategy to connect local farmers with local consumers; develop a regional food supply and strong local economy; maintain a sense of community; encourage land stewardship; and honor the knowledge and experience of growers and producers working with small to medium farms. CSA is a unique model of local agriculture whose roots reach back 30 years to Japan where a group of women concerned about the increase in food imports and the corresponding decrease in the farming population initiated a direct growing and purchasing relationship between their group and local farms. This arrangement, called “teikei” in Japanese, translates to “putting the farmers’ face on food.” This concept traveled to Europe and was adapted to the U.S. and given the name “Community Supported Agriculture” at Indian Line Farm, Massachusetts, in 1985. As of January 2005, there are over 1500 CSA farms across the US and Canada.
